

New National Stadium
Original Design by Zaha Hadid, 2012

**Inviting 2020 Olympic/Paralympic to Tokyo was
utilized to build this monstrous building**

Changed design for rebuilding **Demolishing the legacy** of 1964 Tokyo Olympic

Though the legs were cut and the height was lowered from 75m to 70m, it was still quite massive.

Comparison of EIA applications EIA & EA (National and local levels)

60,000 ~ 80,000

US

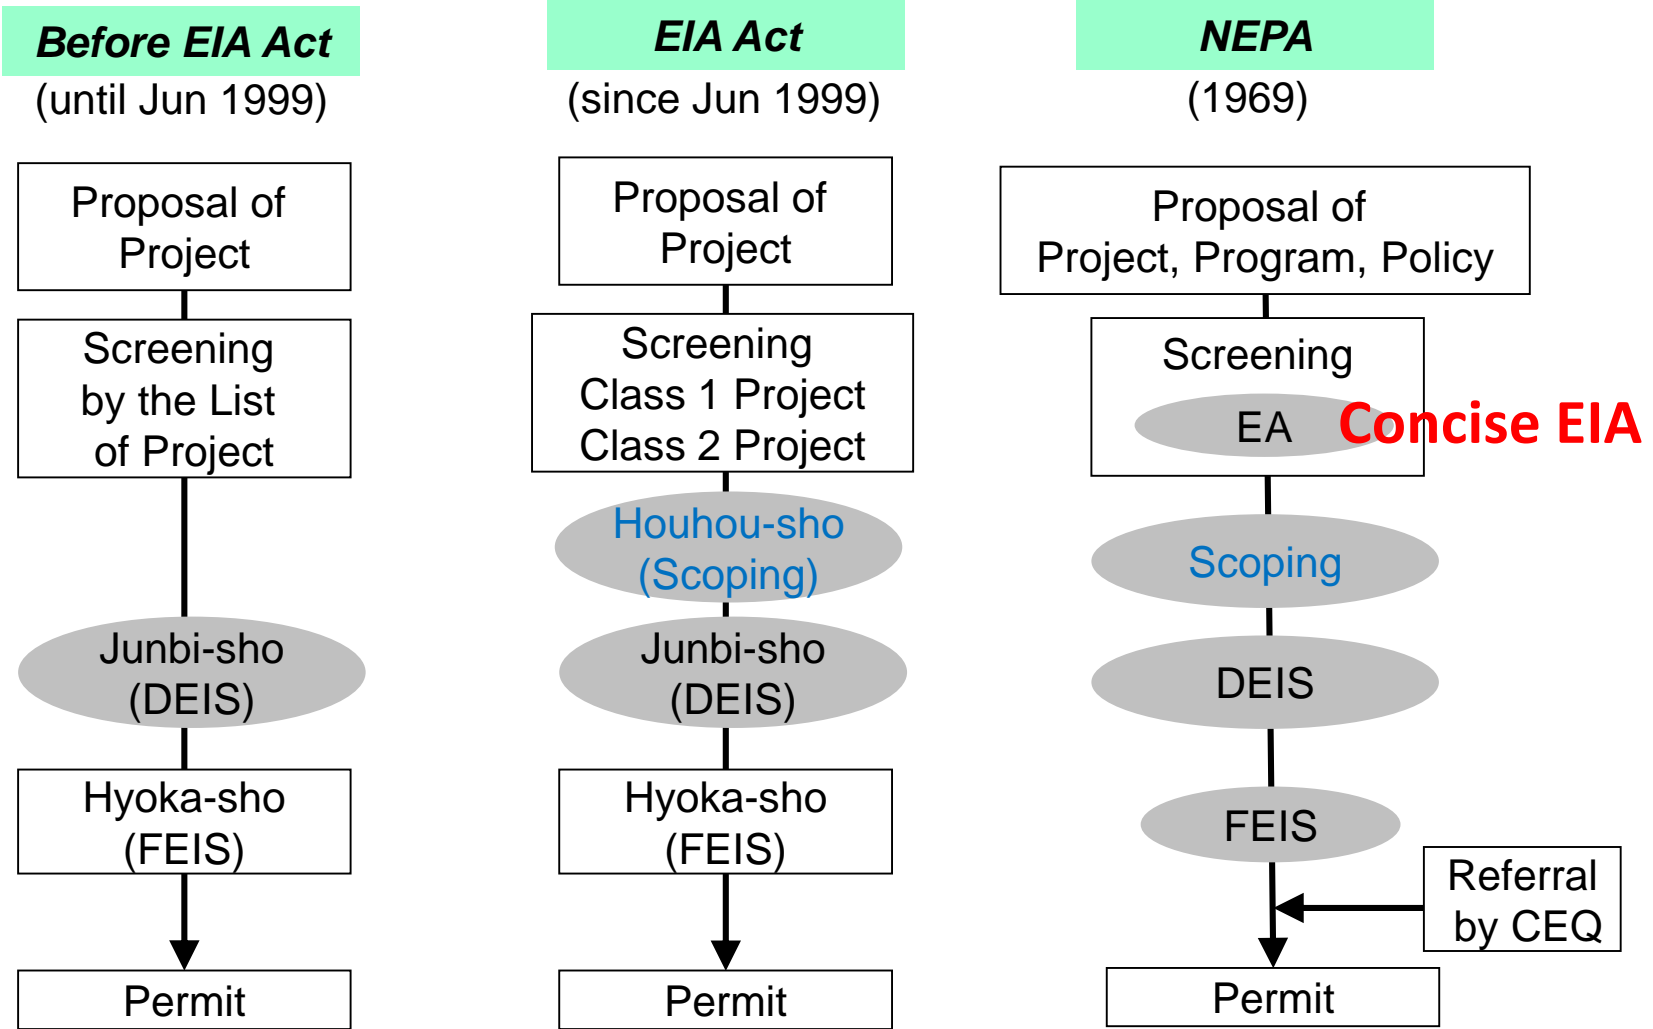

public concerns
would not be reflected
to the decision
In Japan

60 ~ 100

Japan

National Level EIA Systems: Japan and the US

○ Process with Public participation/ Public Involvement
